

- Cold-formed beams with corrugated web and discrete web/flange joints
- Cold-formed member design – comparison of EN/US methods
- Cold-formed steel beams with screwed corrugated webs
- Proposal for the design approach for shear panel diaphragm action
- Buckling analysis of thin-walled structures with GBT – state of the art
- Comparison of EN/US methods for connections in pallet racks
- **Racking and shelving in cold-formed steel**
- Axial capacity of perforated steel columns
- Structural Design using cold-formed hollow sections
